

CHAPTER 5

T H E C O U N C I L

The journey of the WATERKNIGHTS to the council was difficult and delayed by various quarantines. In just half a solar year C19 has fundamentally changed our blue planet. Values are collapsing, firstly freedom of expression and movement. Nbambo, the WATERKNIGHT from the Sub-Saharan universe, opens the council. The WATERKNIGHTS report from their worlds and about their journeys: A growing number of people have no access to strategic water and water theft is becoming a problem (Giulio). Wells and groundwater levels are sinking, rivers and lakes are drying up (Nayla). Water-storing glaciers are disappearing and conflicts are arising over the control of glacial mountain landscapes, most recently between Konfuzius and Krishna (Alexander). The feeding of mankind, whose numbers and demands are growing, needs monocultures and chemistry, which contaminate the water (Avena). The WATERKNIGHTS estimate that the EVIL FORCE will take aim directly at the water of our blue planet after the deployment of C19. Only a few countries are (hesitantly) adopting protective measures. The council decides to put the universal value ZEROWATERLOSS in more concrete terms - 4 tangible guiding principles:

1. Non-discriminatory access to clean water is a human right.
2. Only as much water as the inflow of waters can be used.
3. Water supply infrastructures are built from recycled and recyclable materials (no degradation) with as little CO₂ pollution as possible.
4. ZEROWATERLOSS is a generation project: We build quality for our grandchildren, pay the right price and therefore create jobs and know-how.

ZEROWATERLOSS
